ABOUT ME

Developing intuitive and efficient user interfaces by employing diverse technologies to enhance user experience and engagement across multiple platforms. Seeking opportunities to leverage expertise in frontend development, responsive design, and performance optimization across diverse projects and industries.

CORE COMPETENCIES

Frontend Architecture & Modern Design Patterns

Responsive & Mobile-First Design Approach

UI/UX Optimization & User-Centered Design Implementation

Cross-Browser Compatibility & Accessibility Standards (WCAG)

Web Performance Tuning & Optimization Techniques

Semantic HTML & CSS / SEO-Friendly Development

JavaScript Programming & SPA Development

React, Angular & Vue.js Component Architecture

Modular & Scalable CSS (Sass, Tailwind, etc.)

Clean, Maintainable Code & Best Practices

Code Review, Testing & Debugging Techniques

Agile Development & Collaboration with UX/Backend Teams

WordPress Theme Installation

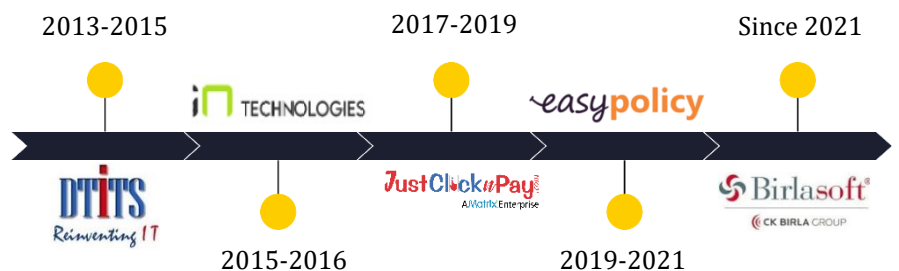

Dheeraj Kumar Saini

Expert Developer, Front-End Developer

PROFILE SUMMARY

- Accumulated extensive expertise over 8 years in user interface development, focusing on frameworks such as React.js, Angular, Vue.js, and Next.js across a range of sectors.
- Functioning as an Expert Developer in Front-End Development at Birlasoft, prioritizing the delivery of superior code quality while fostering robust communication within the team.
- Proving a strong command of various technologies including HTML/HTML5, CSS/CSS3, JavaScript, Vue.js, Sass, Tailwind CSS, Material UI, Bootstrap, and PHP.
- Acknowledged for designing interfaces that prioritize user experience, maintaining compatibility across different browsers, and working collaboratively with mobile development teams.
- Capable of overseeing GoDaddy server management and hosting environments while proficiently converting PSD files into HTML to facilitate smooth web design execution.
- Exhibiting strong proficiency in utilizing Jira and GitLab for effective defect tracking and maintaining version control throughout the development process.
- Well-versed in the principles of frontend architecture, responsive design methodologies, UI/UX enhancement strategies, and techniques for optimizing web performance.
- Achieved significant improvements in web page performance through comprehensive testing and optimization efforts, while effectively managing several projects simultaneously.
- Adept at leveraging a diverse skill set that includes advanced proficiency in JavaScript frameworks, responsive design principles, and performance optimization techniques, ensuring the delivery of high-quality user experiences across various platforms.
- Achieved a significant reduction in page load times by 90%, leading to enhanced user engagement and satisfaction in the current role at Birlasoft, demonstrating a strong commitment to performance excellence.
- Proven ability to mentor junior developers, fostering a collaborative team environment that encourages knowledge sharing and skill development, ultimately enhancing overall team productivity.
- Actively engaged in continuous learning and professional development, staying updated with the latest industry trends and technologies to implement innovative solutions in frontend development.

CAREER TIMELINE

WORK EXPERIENCE

Expert Developer, Front-End Developer
Birlasoft (Noida) | Oct 2021 – Present
Role:

- Spearheading the design and development of front-end architecture for enterprise-grade web applications, ensuring scalability, performance, and responsiveness across devices and browsers.
- Executing pixel-perfect UI implementations based on detailed wireframes, mockups, and specifications provided by UX/UI teams, ensuring consistency with brand guidelines and accessibility standards.
- Conducting comprehensive unit testing and peer code reviews to uphold best practices in code quality, maintainability, and performance optimization throughout the development lifecycle.
- Utilizing project management tools such as JIRA for sprint planning, backlog grooming, and defect tracking, contributing to streamlined Agile/Scrum execution and timely deliverables.

NOTABLE HIGHLIGHTS

- Optimized web page performance, reducing load times and improving user engagement metrics.
- Played a key role in improving defect resolution efficiency and ensuring seamless communication within development teams.
- Improved web page load performance by 80% through optimization techniques including lazy loading and code splitting.
- Reduced front-end development time by 80% by introducing a reusable component library and streamlining the design-to-code workflow.
- Contributed to 85% increase in user engagement by revamping legacy dashboards with a modern UI/UX approach.
- Resolved over 90 critical UI bugs across major product releases, significantly boosting product stability and customer satisfaction.
- Delivered over 80 Agile sprints on schedule by maintaining strong alignment between development milestones and project goals.
- Mentored 85 junior developers, improving onboarding efficiency and elevating overall code quality within the team.

EDUCATION

2013

Bachelor of Technology

Quantum School of Technology

TECHNICAL SKILLS

- HTML / HTML5
- CSS / CSS3
- JavaScript
- Vue.js
- Tailwind CSS / Sass
- Material UI
- Bootstrap
- PHP
- WordPress
- React.js
- AngularJS

PERSONAL DETAILS

Date of Birth : 31st August 1987

Languages Known : English, Hindi

- Collaborating closely with cross-functional teams including UX designers, back-end developers, QA engineers, and product managers to ensure seamless integration and end-to-end functionality.
- Implementing responsive web designs using HTML5, CSS3, JavaScript (ES6+), and frameworks like Angular/React, focusing on fast load times, interactive elements, and an intuitive user experience.
- Optimizing front-end code for performance and SEO, applying best practices such as lazy loading, code splitting, and minimizing render-blocking resources.
- Mentoring junior developers on front-end techniques, code standards, and emerging technologies, fostering knowledge-sharing and continuous improvement within the team.
- Participating in daily stand-ups, sprint retrospectives, and planning meetings to provide updates, raise blockers, and contribute to process enhancements.
- Staying up to date with evolving front-end technologies, tools, and frameworks, and proactively recommending improvements to existing systems and workflows.

Senior UI Developer & Web Designer

Easypolicy Insurance Web Aggregators (Insurejoy, Noida) | Jun 2019 – Oct 2021

Role:

- Designed and developed visually compelling web pages and digital assets tailored to the insurance and healthcare sectors.
- Optimized homepage and landing pages for both desktop and mobile responsiveness using modern design principles.
- Partnered with content writers and the creative director to ensure branding alignment and content consistency.
- Created engaging UI elements including banners, icons, and multimedia features to enhance customer experience.
- Presented and refined design concepts based on team feedback and strategic direction.
- Successfully managed and delivered 4 concurrent projects, showcasing excellent multitasking and time management.
- Contributed significantly to brand consistency and user engagement through intuitive UI/UX design.

Senior Web Designer

Just Click Travels Pvt. Ltd. (Delhi) | May 2017 – May 2019

Role:

- Led UI/UX design initiatives for finance and travel portals, focusing on business-driven customization and innovation.
- Gathered client requirements and created detailed design strategies to enhance user journeys and visual appeal.
- Redesigned the main portal to improve navigation, usability, and aesthetic coherence.
- Conducted design impact analyses and collaborated closely with developers to implement enhancements.
- Delivered a redesigned web portal ahead of schedule, exceeding client expectations on performance and visual appeal.

Web Designer

Technologies Pvt. Ltd. (Gurgaon) | Feb 2015 – Nov 2016

Role:

- Developed UI components and interfaces in alignment with client requirements, focusing on aesthetics and functionality.
- Participated in client requirement sessions and conducted user research to improve interface relevance.
- Chose visual themes and layouts to reflect brand identity and project objectives.
- Provided ongoing development support using Bootstrap and other responsive design frameworks.
- Streamlined development workflows by offering effective UI support and guidance on Bootstrap integration.
- Solved complex layout issues through innovative design approaches.

Web Designer

DTITS India (Noida) | Mar 2013 – Feb 2015

Role:

- Designed web solutions within IT and travel verticals, from wireframing and layout to final implementation support.
- Engaged in requirement analysis, user research, and timeline estimation for project planning.
- Supported the development team with responsive design tools and addressed intricate UI challenges.
- Enhanced user experience and developer productivity through collaborative UI problem-solving and efficient workflow support.
